“To reinvent the future, we must all work together.”

Aaron Donadey — CEO, ADLIS / WEIYIN Corporation

New technology is where the future starts. We keep communication simple and build individual solutions for every client — our concepts come from imagination and common sense in equal measure.

From the first sketch to the finished product we run the whole process in-house — planning, 3D / AR / VR / CAD design, prototyping and manufacture. Bring us your idea and we will build it.
