

Company profile.

ADLIS / WEIYIN Corp. — solar and non-solar smart street furniture, smart indoor and home furniture, and the AI Smart City Platform Management System.

Welcome to our company.

We are a manufacturing company that specializes in solar and non-solar smart street furniture.

With a focus on integrating technology and urban design, our products are crafted to enhance public spaces while promoting environmental responsibility.

Our innovative solutions provide energy-efficient lighting and connectivity options, offering cities and municipalities a sustainable way to improve urban infrastructure.

Our history.

■ 2012 Shenzhen Weiyin Technology Co., Ltd was established.	■ 2015 Adlis Smart Technology was established.	■ 2019 We merged the 2 companies into Adlis / Weiyin Corporation.	■ 2021 Adlis / Weiyin increased its factory size from 2,000 to 15,000 m².	■ 2026 Adlis and Weiyin developed the first AI Smart Platform for managing street furniture.
--	---	--	---	---

Adlis Smart is a division of VPL-GROUP that was established in 2015 with the aim of advancing new technology across three key areas. We specialize in the manufacturing and development of smart benches, smart tables, smart homes, and smart containers.

Shenzhen Weiyin Technology Co., Ltd. was founded in 2012. We specialize in various types of solar smart street furniture, which includes solar benches, solar charging stations, solar bus shelters, and solar trash bins, among others.

In 2019, we combined Adlis and Weiyin Corporation into one entity. Drawing on the expertise of both companies, we developed a unique approach to our operations, service, and support.

Our goal is to provide our distributors with what they truly seek: a customer service experience that is completely dedicated to their needs.

Our value.

01 Vision

By harnessing the power of both solar and traditional energy sources, our smart street furniture not only enhances city aesthetics but also contributes to environmental conservation.

02 Mission

Our mission is to transform urban landscapes by combining advanced technology with sustainable design, fostering a future where technology and nature harmoniously coexist for vibrant, livable cities.

03 Value

Our value is in combining innovative technology with sustainable practices to transform urban areas into smart, eco-friendly spaces. We collaborate with distributors, clients, traders, architects, and partners to develop tailored solutions for each city's unique challenges.

We believe in fostering a culture of creativity and collaboration, where every stakeholder plays a pivotal role in shaping the cities of tomorrow. Our commitment to excellence ensures that the products we deliver not only meet but exceed expectations, paving the way for a greener, smarter future.

Creation & innovation.

AI Smart City Management System

Developed by Adlis Smart, this innovative system uses advanced data analytics and AI to transform urban living. It integrates with city infrastructures, offering real-time insights and predictive capabilities to improve decision-making.

Solutions

This forward-thinking mindset ensures that every solution is not only cutting-edge but also adaptable to the ever-changing needs of the market. Through collaboration and a shared vision, Adlis/Weiyin continues to lead with integrity and dedication, crafting solutions that resonate with customers and communities alike.

Project teams

Adlis/Weiyin has formed project and development teams, including an international business leader, engineers, marketing and design, and quality control. This structure promotes efficient order management and ensures top-quality products through strict quality checks before shipping.

Product overview.

VISION · MISSION

Our innovative product is designed to seamlessly integrate into your daily life, offering intuitive solutions for modern challenges. With a focus on user experience, it combines cutting-edge technology with sleek design to provide exceptional performance and reliability.

PRODUCT

Our product stands at the forefront of innovation, blending functionality with elegance to create a truly unique offering. It is meticulously crafted to enhance your everyday experiences, making tasks simpler and more efficient.

Its user-friendly interface is designed with you in mind, providing effortless navigation and accessibility. With robust features and a commitment to sustainability, our product not only meets but exceeds industry standards, setting a new benchmark for quality and innovation.

WHAT WE DELIVER

- ✓ High-resolution Adlis/Weiyin logo images
- ✓ Installation and assembly instructions
- ✓ CE, IP, and ISO certificates for solar smart furniture
- ✓ Personalized dealer information plate on products
- ✓ Technical specs for purchased products
- ✓ Live class on Adlis application updates
- ✓ Certificates for each component (e.g., Sensor, USB)
- ✓ Quality Control Report on manufacturing processes and tests.

Reduced delivery times

With high production speeds and quality control, we deliver your products faster by eliminating time-consuming error setups.

Samples show room

Folders and documents delivered

Managing current products and new product developments.

Most competitive pricing for distributors

Parts shipments

It allows you to receive products and spare parts in batches that suit your needs.

Variable artwork

Adlis / Weiyin creates customized artwork for every order, which is submitted to the distributor for approval. Any requested changes are promptly addressed, and distributors can modify artwork for different markets. This service is exclusive to distributors, while regular customers receive standard artwork.

TOTAL AVAILABLE MARKET

Adlis/Weiyin market size represented by total number of all distributors and customers who have business agreements and interested parties. We usually calculate at the end of the year; companies can use the market size to determine their market potential.

Assembly process — manufacture program.

Our strategy for investment and investors is based on 2 parts (Adlis Smart Investment - Investor Partners).

Our program of manufacturing process is meticulously designed to ensure efficiency and quality at every stage. It begins with the careful selection of raw materials, sourced from reputable suppliers to guarantee the highest standards.

PROGRAM DOCUMENTS 2024

- ✓ Quality control factory 2024
- ✓ Financial plan 2024
- ✓ Business strategy 2024
- ✓ Service - installation - maintenance
- ✓ Timeline factory 2024
- ✓ Full assembly process

How the new factories work.

01 Strategy

The main factory will manufacture the models as an "Assembly Process" strategy. The components will be sent separately for assembly in the new factories.

02 Development

Necessary documents for new factories include 3D/AR/VR designs, artwork for manufacturing and assembly, technical data, and installation configurations.

03 Factory

Our technical department and AI Platform will be in charge and will form the technical team of the new factories. Same with the AI Platform space.

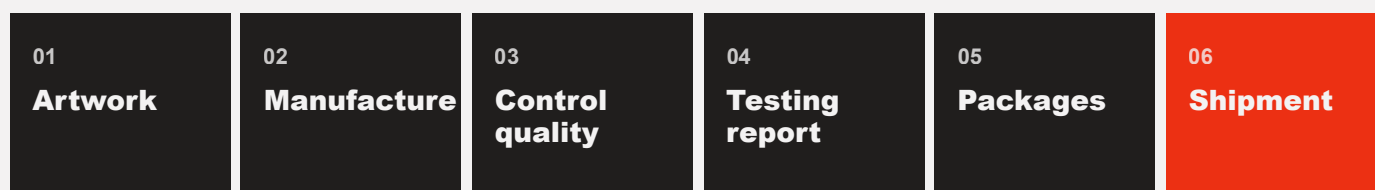

04 Investment

Our department is in charge of all marketing designs, catalogs, data, etc... Our department will prepare everything necessary for the new factories.

05 Control quality

The established quality control of "5 days quality control 5 days/24 hours" will be upheld during the assembly process at each new factory.

Design Dept.

Projects portfolio.

Customers appreciate our clear communication and understanding of their needs, leading to unique and impressive solutions tailored for them.

We develop a full cycle of project documentation: an outline sketch, a design project, We manufacture all our and Your product.

The basic philosophy of our company is to create new technologies, smart and solar products.

We call our approach “living with a concept,” embracing new technology as our future.

Solutions for our clients through the development of projects that use styles and new technology.

We offer various services and styles to achieve your desired results, including design and artwork in 3D/AR/VR, CAD, rendering, and more.

2024 SMART STREET FURNITURE + SMART CABIN

WIN1801

Barcelona

The Solar Smart Trash manufacturing initiative, along with innovative Smart cabins designed for a Spotify marketing campaign, showcases our creativity. Each cabin features a touch screen for selecting music, headphones for an immersive listening experience, and a comfortable seat for relaxation. Additionally, there's a Smart Voice assistant to answer questions, similar to Alexa.

Our Adlis Smart Cabin can be tailored to your specific requirements, and we offer options for both outdoor and indoor settings.

SMART CABIN 2024

Introducing our 2024 Solar/Non-Solar Smart Cabin, customizable to meet all customer specifications and essential requirements.

2022 SMART STREET FURNITURE

WYS1818

Cluj City (Romania)

WYS1818 is our collection of Solar Smart Bus Shelter. Made of #201/#304 stainless steel, we offer standard system and standard system + options (Smart City AI Platform). Includes solar panel, battery, MPPT controller, WIFI, Spot Led Light, charger and others.

We offer digital screen options with hybrid system, indoor options without solar panels, Smart Voice and much more.

Ground anchoring device and steel casing - resistance to vandalism.

ASSEMBLY OPTIONS

WYS1818 for assembly offers other options such as smart voice, digital display with hybrid system, SOS system and our Platform Smart City AI management system.

2024 SMART STREET FURNITURE

WYC1908D

UK (London)

WYC1908D is our collection of Solar Smart Bench. Made of #201/#304 stainless steel, we offer standard system and standard system + options (Smart City AI Platform). Includes solar panel, battery, MPPT controller, WIFI, Spot Led Light, charger and others.

We offer digital screen options with hybrid system, indoor options without solar panels, Smart Voice and much more.

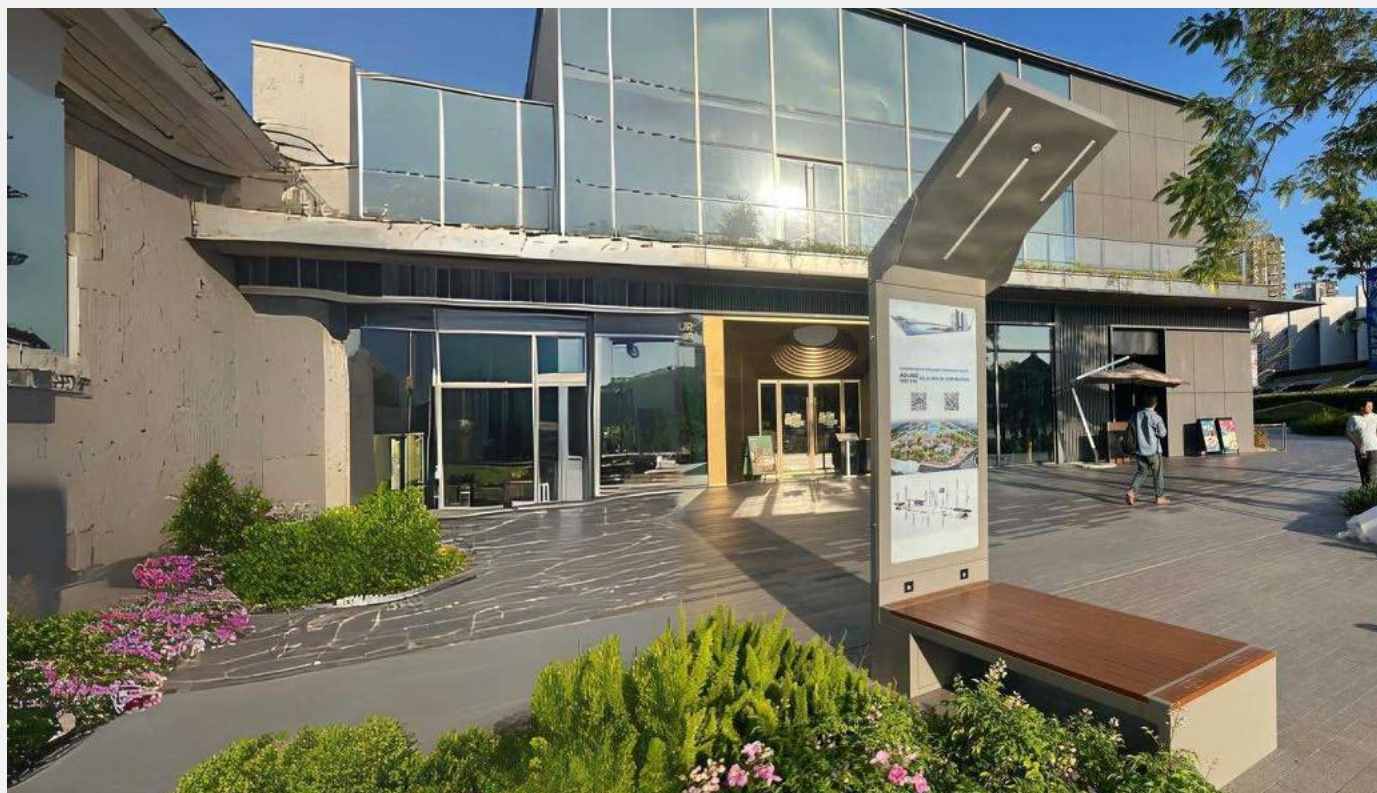

Ground anchoring device and steel casing - resistance to vandalism.

ASSEMBLY OPTIONS

WYC1908D for assembly offers other options such as smart voice, digital display with hybrid system, SOS system and our Platform Smart City AI management system.

2024 SMART STREET FURNITURE

WYC1916

North Carolina (USA)

WYC1916 is our collection of Solar Smart Bench. Made of #201/#304 stainless steel, we offer standard system and standard system + options (Smart City AI Platform). Includes solar panel, battery, MPPT controller, WIFI, Spot Led Light, charger and others.

We offer digital screen options with hybrid system, indoor options without solar panels, Smart Voice and much more.

ASSEMBLY OPTIONS

WYC1916 for assembly offers other options such as smart voice, digital display with hybrid system, SOS system and our Platform Smart City AI management system.

2025 SMART STREET FURNITURE

WYC1812

Hong Kong

WYC1812 is our collection of Solar Smart Table. Made of #201/#304 stainless steel, we offer standard system and standard system + options (Smart City AI Platform). Includes solar panel, battery, MPPT controller, WIFI, Spot Led Light, charger and others.

We offer digital screen options with hybrid system, indoor options without solar panels, Smart Voice and much more.

Ground anchoring device and steel casing - resistance to vandalism.

ASSEMBLY OPTIONS

WYC1812 for assembly offers other options such as smart voice, digital display with hybrid system, SOS system and our Platform Smart City AI management system.

2023 SMART STREET FURNITURE

WYS1817

Cluj City (Romania)

WYS1817 is our collection of Solar Smart Bus Shelter. Made of #201/#304 stainless steel, we offer standard system and standard system + options (Smart City AI Platform). Includes solar panel, battery, MPPT controller, WIFI, Spot Led Light, charger and others.

We offer digital screen options with hybrid system, indoor options without solar panels, Smart Voice and much more.

Ground anchoring device and steel casing - resistance to vandalism.

ASSEMBLY OPTIONS

WYS1817 for assembly offers other options such as smart voice, digital display with hybrid system, SOS system and our Platform Smart City AI management system.

Customization & options.

Customization

Several options to choose from. Possibility of changing measurements, increasing the power of the solar panel and others.

3D / AR / VR

3D Design.

Optional

Assembly offers other options such as smart voice, digital display with hybrid system, SOS system and our Platform Smart City AI management system.

OPTIONAL

- ✓ Platform Adlis Smart City AI Management System
- ✓ Smart Voice
- ✓ Smart camera
- ✓ SOS button
- ✓ Sensors (CO2, Noise, waterproof, Temperature etc.)
- ✓ Digital Display / Led Screen for advertising
- ✓ Hybrid system: solar + electricity
